

Lavish Presets Installation Guide

Welcome

Thank you for purchasing Lavish Presets!

Lightroom Classic

1. Download and unzip your purchase.
2. Open Lightroom Classic and go to Develop.
3. In the Presets panel click the + icon and choose **Import Presets**.
4. Select the .xmp files and click Import.
5. Your presets will appear under the Lavish Presets group.

Lightroom Desktop

Open Lightroom Desktop → File → Import Profiles & Presets → Select the .xmp files.

Lightroom Mobile

If you sync Lightroom Desktop and Mobile, import on Desktop and allow Adobe to sync automatically. Or in Lightroom Mobile: Presets → ••• → Import Presets → choose the .xmp files.

Best Results

Shoot in RAW whenever possible. Adjust Exposure and White Balance to match each image. All presets are fully customizable.
